FOR IMMEDIATE RELEASE

**Intelident Solutions Introduces Advanced Oral Cancer Screening Technology
Into Coast Dental Locations**

TAMPA, Fla. (August 3, 2005) — Intelident Solutions, a Tampa, Florida-based dental technology and management company and the parent company of Coast Dental Services, announced a commitment to use advanced technology to screen patients for oral cancer during annual exams in all Coast Dental locations.

All 104 Coast Dental offices will incorporate the ViziLite® oral lesion identification system into comprehensive annual exams. A ViziLite exam supplements a standard head and neck exam and provides dentists with a quick, painless and non-invasive way to detect abnormalities that might develop into oral cancer, before they can be visualized. Patients rinse with a mild-tasting solution that turns abnormal oral tissue distinctly white under ViziLite's chemiluminescent light source.

Oral cancer is the sixth deadliest form of cancer but is among the most curable if caught in the early stages. Anyone can get oral cancer, regardless of whether they have risk factors. In fact, 27 percent of all people who get oral cancer have no risk factors for the disease. Most oral cancers are diagnosed when lesions are larger and have spread to the lymph nodes under the jaw and in the neck. Because of delayed detection, 25 percent of oral cancers are fatal.

Adam Diasti, DDS, Intelident Vice Chairman, and Dental Director of Coast Dental, said, "Dentists are well suited to screen for oral cancer since they typically see patients at least twice a year and conduct a thorough oral exam annually. Intelident is proud to be a leader in offering this advanced technology. After a test pilot in several practice locations, Coast dentists felt the technology brought real value to their patients. Today we announce a practice-wide roll out."

###

About Intelident Solutions, Inc.

Intelident Solutions is a privately-held company dedicated to advancing the practice of dentistry through innovation and technology. It is the parent company of Coast Dental Services and other dentistry-related businesses and employs nearly 1,000 staff members throughout the Southeast. The company is headquartered in Tampa, Florida.

About ViziLite

ViziLite is a product of Zila, Inc. In November of 2001, the U.S. Food and Drug Administration cleared ViziLite as an adjunct to visual examination of the oral cavity. It remains the only medical device for this application cleared for use in a population at increased risk for oral cancer.
